Status of SEA internationally

politics and practice

"Politics is the process by which the society chooses the rules that will govern it"
Acemoglu and Robinson, 2012

Different interpretations of SEA

How the world see SEA (Partidário, 2012)

The elephant metaphor of reality

Over the years many names have been used to address SEA...

- 
- EIA of PPP
 - environmental assessment
 - programmatic assessment
 - policy assessment
 - integrated assessment
 - sustainability assessment

and more....

(Partidário, 2000)

International systems on SEA

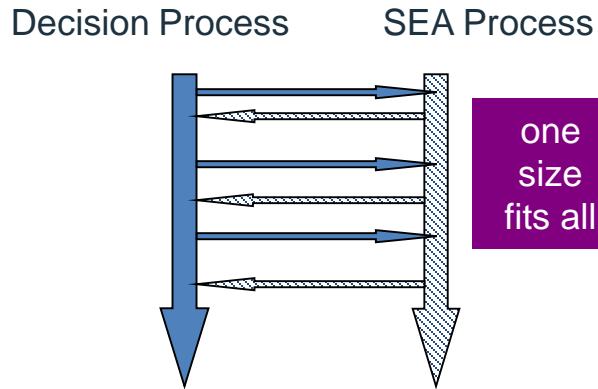

SEA - From "big EIA" to strategic thinking

What works better depends on purpose and context (Partidário, 2009)

Models of SEA

1. Parallel model

2. Decision-centred model

(Partidário, 2007)

SEA steps

Standard process for impact assessment SEA

European Commission

European Commission, 2013

(Beacon Manual, 2005)

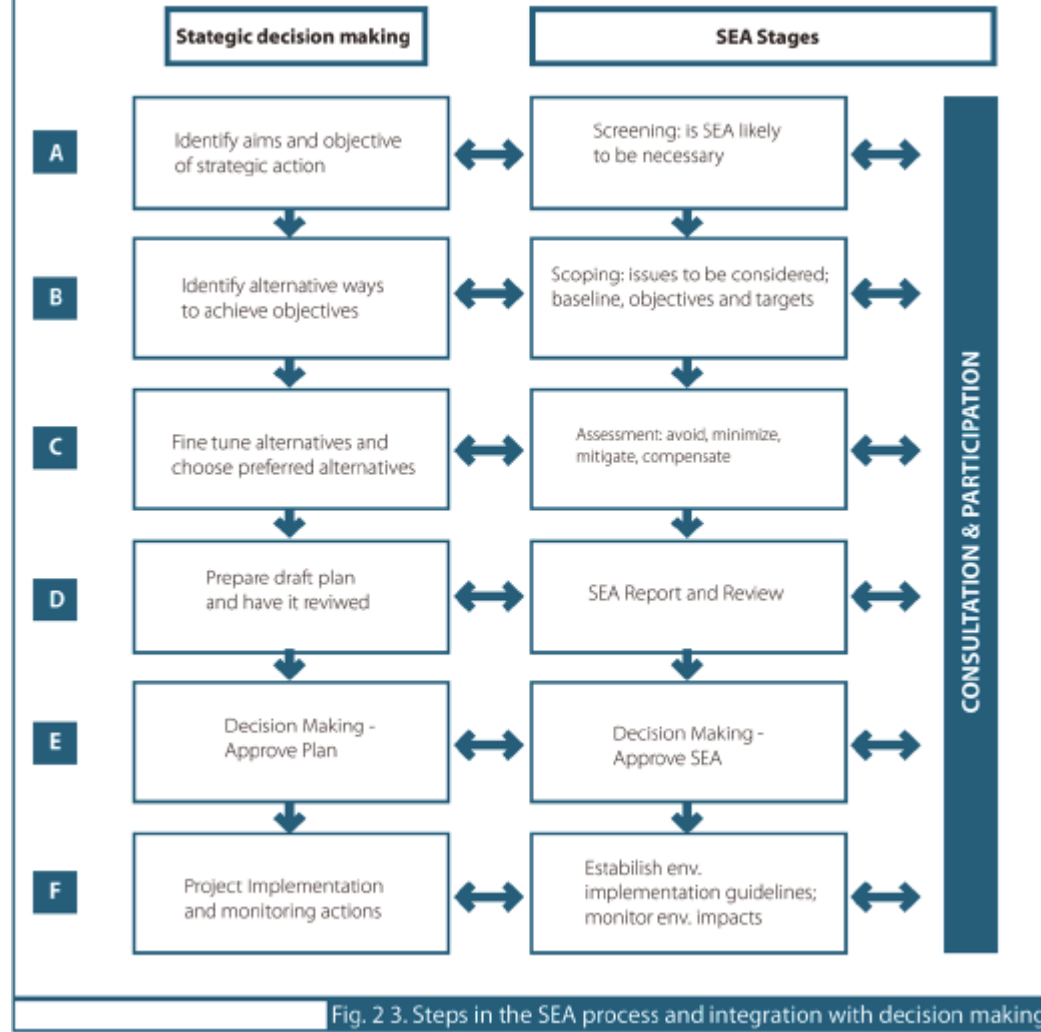

Fig. 2 3. Steps in the SEA process and integration with decision making

The Netherlands Commission on Environmental Assessment (NCEA) describe differently the same steps for EIA and SEA

Initial Dutch impact assessment model for SEA

| | SEA | EIA |
|-----------------------------|--|--|
| Screening | Mostly decided case by case | Projects requiring EA are often listed |
| Scoping | Combination of political agenda, stakeholder discussion and expert judgement | Combination of local issues and technical checklists |
| Public participation | Focus on representative bodies | Often include general public |
| Assessment | More qualitative (expert judgement) | More quantitative |
| Quality review | Both quality of information and stakeholder process | Focus on quality of information |
| Decision making | Comparison of alternatives against policy objectives | Comparison against norms and standards |
| Monitoring | Focus on plan implementation | Focus on measuring actual impacts |

Establish the SEA
context

Implement the
SEA

Inform, influence,
and make
recommendations

Monitor and
evaluate

Phases in SEA (OECD-DAC, 2006)

1. Establishing the context for SEA
 - Screening
 - Setting objectives
 - Identifying **stakeholders**
2. Implementing the SEA
 - Scoping (in dialogue with **stakeholders**)
 - Collecting baseline data
 - Identifying alternatives
 - How to enhance opportunities and mitigate negative impacts
 - Quality assurance
 - Reporting
3. Informing decision making
 - Make recommendations (in dialogue with **stakeholders**)
4. Monitoring and evaluation

OECD-DAC, 2006

| Monitoring | F | 4. Monitoring and evaluation |

Riki Therivel suggested methodology for SEA in the UK (2004)

Generic SEA steps in Hong-Kong

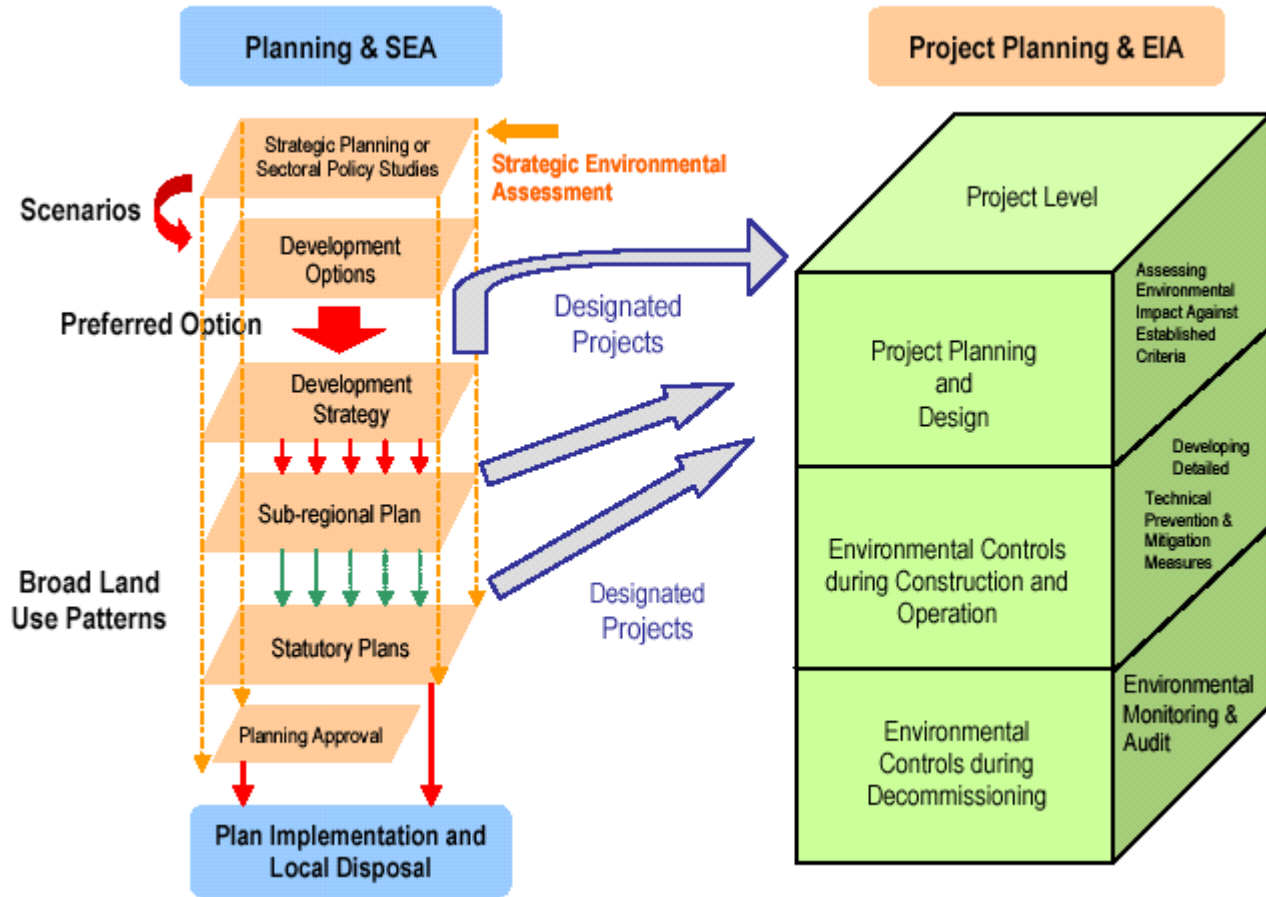

Continuous interaction with public and stakeholders

1. Understanding the needs, nature and objectives of PPP
2. Design/select SEA process and methods
3. Initial screening and scoping

4. Baseline / background studies INITIAL ASSESSMENT
5. Identify and examine strategic environmental issues and linkages
6. Identify and evaluate possible options, alternatives means and resulting environmental implications

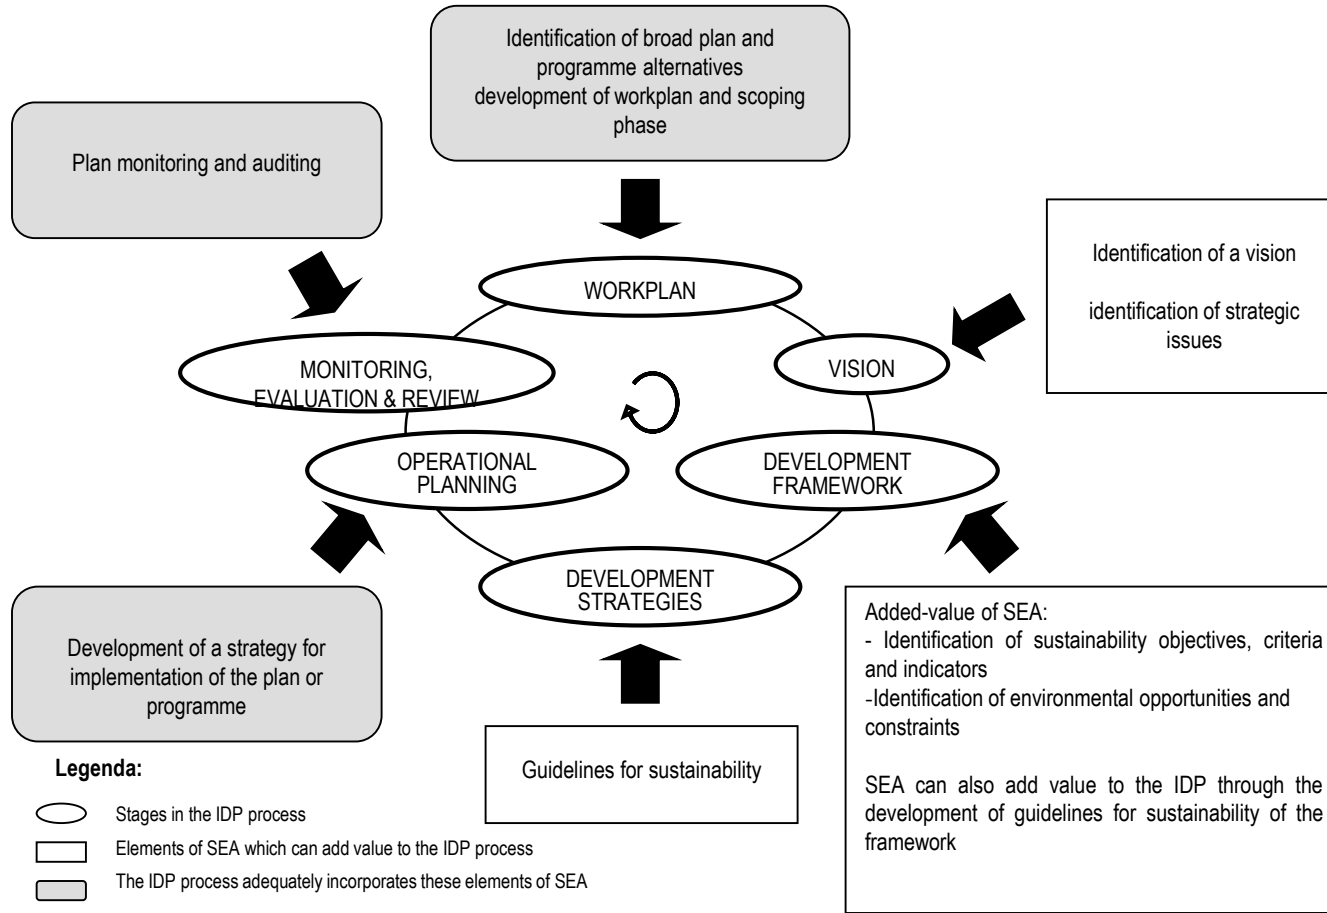

7. Identify and evaluate preferred options FINAL ASSESSMENT
8. Determine follow-up actions, monitoring requirements

Hong-Kong Manual for SEA, 2004

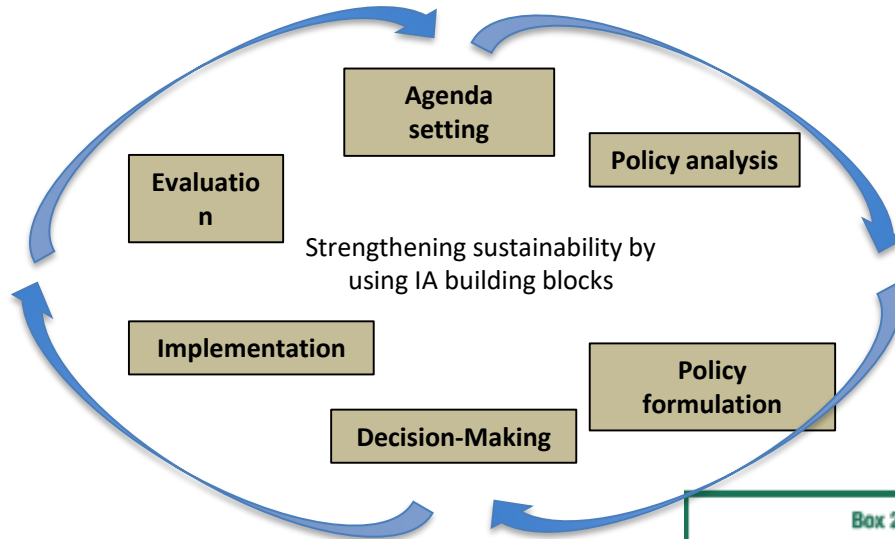

Hong-Kong Manual for SEA, 2004

South Africa - Integrated Development Planning (IDP) Process and elements of SEA (DEAT-CSIR, 2000)

UNEP, 2009 (<http://www.unep.ch/etb/publications/index.php>)

Box 2.1: Integrated Assessment building blocks

A. Process

- A1: Process design and links
- A2: Policymaking decision windows
- A3: Communication strategy formulating

B. Policy/Institutional context

- B1: Institutional analysis and change
- B2: IA team organizational model
- B3: Stakeholder engagement and strengthening civil society
- B4: Evaluation and learning

C. Analytical Contents

- C1: Strategic framework and identification of key sustainability issues
- C2: Trends and scenarios
- C3: Identification of opportunities and alternative policy option
- C4: Assessment of impacts/risks and benefits
- C5: Monitoring and evaluation

2009

UNEP (<http://www.unep.ch/etb/publications/index.php>)

Integrated Assessment: building blocks (UNEP, 2009) Components of an SEA

A. Process

- A1: Process design and links
- A2: Policymaking decision windows
- A3: Communication strategy formulating

B. Policy Institutional Context

- B1: Institutional analysis and change
- B2: IA team organizational model
- B3 Stakeholder engagement and strengthening civil society
- B4: Evaluation and learning

C. Analytical contexts

- C1: Strategic framework and identification of key sustainability issues
- C2: Trends and scenarios
- C3: Identification of opportunities and alternative policy options
- C4: Assessment of impacts / risks and benefits
- C5: Monitoring and evaluation

Status of SEA International

| Bad current practice | Current practice | Innovative practice |
|----------------------|---|---------------------------|
| report driven | Impact driven (Traditional SEA – uses same logic of EIA) | Strategic thinking SEA |

Impact based practice vs strategic thinking

- Impact based – seek impact assessment – backwards looking (assesses effects on existing values, corrects situations)
- Strategic thinking – seek creating contexts for sustainability – forward looking (opens opportunities, explores new values)
